

Medico Project Team (Fully Collaborative Effort)

The Medico system was developed through a comprehensive team effort, where all members participated equally and hands-on in every single stage of the project. The team collectively handled all research, data gathering, documentation, and UI/UX design components, which included:

- Conducting user research, drafting Interview questions, and designing Surveys for doctors, patients, and administrators.
- Performing Market Fit Analysis and global/local Competitive Analysis.
- Conducting UX research to map out the Empathy Map and User Journey Maps (both before and after utilizing Medico).
- Formulating the SWOT Analysis and writing the final technical documentation.
- Structuring the Information Architecture and outlining detailed User Flows for the three core roles: Patient, Doctor, and Clinic Admin.
- Crafting the final mobile application UI/UX Layouts and core design wireframes.

Team Members :

- **Fatma Al-Zahraa Mohamed AbdElkhaleq**
- **Felobater Dawoud Soliman Samouel**
- **Hend Hamada Farrage Ali**
- **Shahd Shaaban Mohamed Ali**

Supervised by: Eng. **Sama Yasser**
