Key takeaways from the survey

Current Systems Used:

- **Paper-based: 8**
- **Combination of paper & digital: 7**
- **Excel/manual: 4**
- **Clinic system: 1**

Insight: 86% of respondents do not use a fully integrated digital system.

Major Challenges:

- **Missing patient history: 50%**
- **Difficulty accessing records: 36%**
- **Time-consuming documentation: 36%**

Unified System Benefit: 77% agreed that a centralized medical history would improve patient care.

Other Insights:

- **Scheduling Issues: Missed appointments, double booking, poor time management.**
- **Communication Needs: Most doctors rely on messaging apps (e.g., WhatsApp) or phone calls — highlighting the demand for a secure, in-app communication tool.**
